

Sujal Mainali

Full Stack Web Developer | Kathmandu, Nepal | +977 9746805637 | sujalmainali.com.np | github.com/jerrysm97

PROFESSIONAL SUMMARY

First-year Computer Science student at IIMS College who builds fast, ships real products, and figures things out by doing. I learn by creating — turning ideas into working, production-grade web applications across the full stack. Whether it is designing a database schema, wiring up a Node or Laravel backend, or building out a React frontend, I focus on understanding how systems think rather than just how they are written. Seeking a Full Stack internship where I can contribute immediately and grow through real-world challenges.

TECHNICAL SKILLS

Backend	PHP, Laravel, Node.js, Express, REST API Design, MVC Architecture
Frontend	React, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
Database	MySQL, SQLite, Drizzle ORM — schema design, relationships, query optimization
Tools	Git, Docker, Vercel, VS Code, Postman

PROJECTS & BUILDS

School Management System (Live — build-system-tau.vercel.app)

TypeScript · React · Node.js · Express · Drizzle ORM · SQLite · Docker · Vercel

- Built a full-stack school ERP system with separate client, server, and API layers — structured for real institutional use.
- Implemented financial management modules including accounts receivable, refund processing, dunning workflows, and payment reconciliation.
- Handled schema design with Drizzle ORM, Dockerized the application, and deployed to Vercel with a production-ready setup.
- Demonstrates ability to architect, build, and ship a complex, multi-module system end-to-end.

Cricket Match Predictor (github.com/jerrysm97/cricket-prid)

JavaScript · React · Node.js · Express · CricAPI · REST APIs

- Built an AI-powered cricket match prediction system with a React frontend and Node.js/Express backend.
- Implemented a weighted prediction algorithm analysing head-to-head records, team form, home advantage, player strength, and toss data — achieving 85%+ accuracy.
- Integrated live CricAPI for real-time match data with scores refreshed every 15 minutes.
- Full MVC structure on the backend with documented REST API endpoints for matches, predictions, and statistics.

Chill at Hill Hospitality Management Platform (Live Production)

PHP · Laravel · MySQL · HTML · CSS · JavaScript

- Independently conceived and shipped a complete hospitality management platform — from blank file to live production.
- Built the full backend: booking engine, property management logic, user authentication, and optimized database schema.
- Sole developer across every layer of the stack: routing, controllers, models, views, and database migrations.

Personal Portfolio (sujalmainali.com.np)

HTML · CSS · JavaScript · TypeScript

- Designed and built a personal portfolio live at sujalmainali.com.np showcasing all projects and technical work.

EDUCATION

Bachelor's in Computer Science (In Progress) — IIMS College, Naxal, Nepal (Jan 2026 Intake)

+2 in Science — Glacier International College, Kathmandu, Nepal

LEADERSHIP & ADVOCACY

Coordinator "Scan the Scammers" Campaign (Global Initiative, Ongoing)

- Leading a global digital initiative protecting students from educational fraud managing communities, communications, and outreach strategy.
- Applied SEO and social media tactics to amplify awareness and reach vulnerable student populations worldwide.

HOW I WORK

- Builder Mindset: Ships working products, not just code snippets
- Full Stack Thinking: Comfortable owning both sides of the application
- Logic-First: Understands the 'why' behind every system decision
- Fast Learner: Picks up new stacks and codebases by diving straight in

LANGUAGES
